Subject: Collider – Accelerator Division / Superconducting Magnet Division

Environmental Management System (EMS)

and

Occupational Health and Safety Management System (OHSAS)
Readiness Assessment
(QA 2007-215)

This internal readiness assessment was conducted to determine whether the Collider-Accelerator Department (C-AD) and the Superconducting Magnet Division (SMD) Environmental Management System (EMS) (which has been implemented for eight years) and their Occupational Health and Safety Management System (OH&S) Programs (implemented for four years) are being implemented in accordance with Environmental Management System 14001- 2004 and Occupational, Health and Safety Management System OHSAS 18001 – 1999 Standards. To accomplish this task the assessment focused on reviewing EMS/OH&S elements for compliance and effectiveness in meeting the EMS and OH&S Policy and Objectives within their operating processes. In addition, EMS/OHSAS record maintenance controls were also reviewed. This appraisal was performed on April 18 through April 30, 2007. A completed assessment checklist, containing criteria is available upon request. Personnel interviewed during this assessment were P. Cirnigliaro, F. Cullen, M. Heimerle, R. Karol, D. Lederle, E. Lessard, J. Maraviglia, D. Passarello, C. Porretto, J. Scott and A. Warkentien.

Based on interviews conducted and documents reviewed, the C-A/SMD EMS and OH&S Management System written programs are being implemented in accordance with the SBMS Procedures Subject Area requirements. The EMS and OH&S programs are integrated into everyday work activities through Operating Procedures and Work Planning and Control Processes with the exception of one observation that affects both EMS and OHSAS program process.

As identified in 2006, employee representatives from C-AD and SMD who have been appointed to the Worker Occupational Safety and Health (WOSH) Committee have participated throughout the year with ensuring worker concerns, ideas and inputs related to OH&S and EMS topics are received, reviewed and responded to by either the Committee or Upper Management. In addition, group supervisor's and manager's participate in weekly safety meetings to discuss topics such as EMS/OH&S objectives, human performance, Code regulations, and on-going related issues to Staff.

Observation 1: (EMS/OHSAS Element 4.3.3) Objectives and Targets states that the organization shall establish, evaluate and maintain documented environmental/occupational health and safety objectives, at each relevant function and level within the organization. Contrary to this requirement it was discovered that the C-AD FY 2007 Self-Assessment Report which identifies an evaluation of the objectives and measures has not been issued as required. Responsible Individual: D. Passarello

| a) is appropriate to the nature, scale and environmental impacts of its activities, | | | |
| products, or services; | | | |
| b) includes a commitment to continual improvement and prevention of pollution; | | | |
| c) includes a commitment to comply with applicable legal requirements and with | | | |
| other requirements to which the organization subscribes which relate to its | | | |
| environmental aspects; | | | |
| d) provides the framework for setting and reviewing environmental objectives and | | | |
| targets; | | | |
| e) is documented, implemented, maintained | | | |
| f) is communicated to all persons working for or on behalf of the organization; | | | |
| g) is available to the public. | | | |

FACILITY IMPLEMENTATION OF STANDARD:

The Laboratory Environmental, Safety, Security and Health Policy plaques are posted in the chairman's/Managers offices and in the lobby of Building 902 and 911. Employee awareness of this policy was not reviewed due to upcoming scheduled forums and awareness initiatives. The EMS Policy is also addressed in the BNL Bulletin and Monday Morning Memo from the BNL Director. Based on past audit reviews of this element employees were found knowledgeable of requirements. In addition, C-AD is presently assisting the Laboratory by converting the BNL EMS Interim Procedures into SBMS Subject Area documents.

OPTIONAL AUDITOR QUESTIONS:

Is the policy defined and is it appropriate to the type, size, and environmental impacts of the activities?

Is the policy aligned with the scope of the EMS?

Has it been endorsed by top management?

Does the policy include a commitment to continual improvement and evidence of such in the organization's operations?

Does the policy include a commitment to pollution prevention and evidence of such in the organization's operations?

Does the policy include a commitment to compliance to legal requirements and is there evidence indicating intent to comply?

Does the organization subscribe to other requirements, and are they covered also?

Does the policy include a mechanism for setting and reviewing environmental objectives and targets?

Is the policy documented, implemented, maintained?

Is the policy communicated to all persons working for or on behalf of the organization?

Do persons working for or on behalf of the organization exhibit knowledge of environmental policy (key commitments and how they relate to job)

Is the policy available to the public?

| | | | | | | | |
| ISO 14001 STANDARD: | | NO | PARTIAL | YES | | | |
| The organization shall establish, implement and n a) to identify the environmental aspects of its active defined scope of its EMS that it can contribute into account planned or new developments, of products or services, and b) to determine those aspects that have or can have environment (i.e., significant environmental account in establishing, implementing and maintal. The organization shall document this information. | ctivities, products, or services within rol and those it can influence taking or new or modified activities, ave significant impacts on the aspects). environmental aspects are taken into ining its EMS. | | | X | | | |

FACILITY IMPLEMENTATION OF STANDARD:

The mechanism used to document Significant Aspects is the SBMS Subjects Area, Identification of Significant Environmental Aspects and Impacts. The C-AD/SMD identifies environmental aspects during the planning phase of its operations using the Work Planning Systems, and Safety Review Systems. The work planning system has a section that addresses EMS for work done by C-A/SMD employees, BNL employees performing work in the C-A/SMD facilities as well as external contractors performing work within the facilities. C-A and SMD has an EMS team which reviews the existing significant aspects on an annual basis.

As identified in 2006, legal requirements come from external agencies to Laboratory level personnel. These requirements are communicated through the generation of subject areas. Cognizant C-AD and SMD personnel have subscribed to the SBMS subscription Service that notifies users of new and updated subject areas. The assigned ECR for C-AD and SMD also, as part of his job function, makes sure that both C-AD and SMD facilities is made aware of new requirements and works to assure department compliance to these requirements. The C-A/SMD EMP list legal & other requirements as applicable. The ECR ensures the incorporation of new requirements as a member of the ASSRC and ESRC and through incorporation of new requirements into the process assessments.

| Environmental Management System Model PLANNING | | | |
|--|----|---------|-----|
| ELEMENT: 4.3.3 TITLE: Objectives, Targets, and Programme | S | | |
| | | | |
| ISO 14001 STANDARD: | NO | PARTIAL | YES |
| The organization shall establish, implement and maintain documented environmental objectives and targets, at relevant functions and levels within the organization. | | X | |
| The objectives and targets shall be measurable, where practicable, and consistent with the environmental policy, including the commitments to prevention of pollution, to compliance with applicable legal and other requirements to which the organization subscribes, and to continual improvement. | | | |
| When establishing and reviewing its objectives and targets, an organization shall take into account the legal requirements and other requirements to which it subscribes, and its significant environmental aspects. It shall also consider its technological options, its financial, operational and business requirements, and the views of interested parties. | | | |
| The organization shall establish, implement and maintain (a) programme(s) for achieving its objectives and targets. Programme(s) shall include: | | | |
| a) designation of responsibility for achieving objectives and targets at relevant functions and levels of the organization;b) the means and time-frame by which they are to be achieved. | | | |

FACILITY IMPLEMENTATION OF STANDARD:

Observation: Objectives, Targets and Programmes are establish, documented and maintained as identified in OPM 14.1, Environmental Management Program for Collider-Accelerator Department and Superconducting Magnet Division at each relevant function and level within the organizations. This year, employee interface (via. WOSH Committee Members) was requested to review this year's (2007) EMS Targets and Objectives that represent meaningful environment goals. The reason for this review is to comply with the 10CFR851 requirement for worker participation in establishing Environmental, Health and Safety goals. Based on this review and feedback C-AD Management enhanced their Targets and Objectives for 2007. However, on March 15, 2007 OPM 14.1, Environmental Management Program for C-AD and SMD was revised and issued. Due to the date of issuance of this OPM, the C-AD FY 2007 Self-Assessment Report which identifies an evaluation of the objectives and measures has not been issued as required. Based on discussion with the author of the 2007 Self-Assessment Report it is scheduled for issuance during the first week of May 2007.

|---|-------|------------------|-----|
| ELEMENT: 4.4.4 TITLE: (EMS) Documentation | | | |
| | | | |
| ISO 14001 STANDARD: | NO | PARTIAL | YES |
| The EMS documentation shall include: a) the environmental policy, objectives and targets, b) description of the scope of the EMS, c) description of the main elements of the EMS and their interaction, and reference to related documents, d) documents, including records, required by this International Standard, and e) documents, including records, determined by the organization to be necessary to ensure the effective planning, operation and control of processes that relate to its significant environmental aspects. | | | X |

FACILITY IMPLEMENTATION OF STANDARD:

The C-AD/SMD Environmental Management Program Description describes how the EMS program is implemented through use of the BNL SBMS and the Operational Procedures Manual. The Contacts and Responsibilities attachment gives pertinent information regarding individuals responsible at the department as well as the laboratory level. In addition, the Document Flowdown matrix gives a detail of the various documents of the C-A/SMD EMS.

EXISTING PROCEDURES AND DOCUMENTATION (LIST):

OPM 1.10.2 – C-AD/SMD Environmental Management Program Description

OPM 1.10.2.b – C-A/SMD EMS Contacts and Responsibilities

|---------------------|----------------|----------------|
| | NONCONFORMANCE | NONCONFORMANCE |

OPTIONAL AUDITOR QUESTIONS:

How is the organization's EMS documented and maintained?

Does the EMS documentation address all required content?

Does the system document how the related documentation [regulations, permits, forms, etc.] is to be used?

Have they determined what documents and records are needed to ensure effective planning, operation and control of processes

that relate to significant aspects?

Organization: C-AD/SMD Date: 4/18/07 Lead Auditors: R.Savage/M.VanEssendelft

| Environmental Management System Model IMPLEMENTATION | AND (| DPERATION | |
|---|-------|------------------|-----|
| ELEMENT: 4.4.5 TITLE: Control of Documents | | | |
| | | | |
| ISO 14001 STANDARD: | NO | PARTIAL | YES |
| Documents required by the EMS and by this International Standard shall be controlled. Records are a special type of document and shall be controlled in accordance with the requirements given in 4.5.4. The organization shall establish, implement and maintain a procedure(s) to | | | X |
| a) approve documents for adequacy prior to issue, b) review and update as necessary and re-approve documents, c) ensure that changes and the current revision status of documents are identified, d) ensure that relevant versions of applicable documents are available at points of use, | | | |
| e) ensure that documents remain legible and readily identifiable, f) ensure that documents of external origin determined by the organization to be necessary for the planning and operation of the EMS are identified and their distribution controlled, and | | | |
| g) prevent the unintended use of obsolete documents and apply suitable identification to them if they are retained for any purpose. | | | |

FACILITY IMPLEMENTATION OF STANDARD:

Documents required by the EMS and by this International Standard are controlled as required. Both organizations have established, implemented and maintain procedure(s) to address approve documents usage, current revision status of documents, ensure that documents remain legible and identifiable, ensure that documents necessary for the planning and operation of the EMS are identified and their distribution controlled, and have controls in place to prevent unintended use of obsolete documents. In addition, vendor manuals are identified and posted on the C-AD web page and DOE performed a Design Control Review of C-AD drawing controls. DOE identified (1) observation that OPM 13.6.1 should be linked to the SBMS Subject Area. This OPM is currently being revised to reflect this condition.

EXISTING PROCEDURES AND DOCUMENTATION (LIST):

OPM 1.1, OPM 1.2, OPM 1.4, OPM 1.4.3, OPM 1.4.7, OPM 13.4, OPM 13.4, OPM 13.6.1

COMMENTS: None

EVALUATION:

|---------------------|----------------|----------------|
| | NONCONFORMANCE | NONCONFORMANCE |

OPTIONAL AUDITOR QUESTIONS:

Are there procedures for controlling and maintaining all documents required by ISO 14001? Are the documents accessible? Are EMS documents reviewed, updated and approved or re-approved? Where does this requirement exist? (Note: periodic reviews are no longer required.)

Do document control procedures cover all required elements?

Are latest versions of documents available in all areas and by all personnel that perform tasks essential to the effective functioning of the EMS?

Are documents of external origin needed for the EMS (e.g., maintenance manuals, CFRs, etc.) identified and controlled? Are obsolete documents removed from use and assured from unintended use? Are any historical copies maintained & labeled?

OPTIONAL AUDITOR QUESTIONS:

Have the operations and activities been identified that are associated with the significant environmental aspects?

Are the identified operations and activities consistent with the company's policy, objectives and targets?

Is there a maintenance plan for the above identified operations and activities?

Does work planning take significant aspects into account and ensure that adequate controls are established?

Have procedures been established and maintained for the above operations that, if they are not followed for these situations, could lead to deviations from the environmental policy and the objectives and targets?

Are operating criteria clearly established and documented in the procedures for the operations and activities identified above? Have the significant environmental aspects of raw materials, supplies and services used in the above operations and activities been identified?

Are there procedures for handling raw materials, supplies and services used in the activities associated with significant impacts? Are relevant procedures and requirements communicated to the appropriate suppliers and contractors?

Are operational controls in place and working?

| documentation. | | | | |
| | | | | |

FACILITY IMPLEMENTATION OF STANDARD:

EMS nonconformances are documented by three mechanisms: Occurrence Reporting and Processing System (ORPS), Critiques, and through the SBMS Nonconformance & Corrective and Preventive Action subject area. Critiques and NCR's are tracked for closure and corrective action through the family ATS. ORPS reportable incidents are tracked to closure through a higher level Laboratory &DOE tracking system. Copies of Critiques and NCR's with supporting documentation are on the C-AD web page and are available for review. ORPS can be found through the C-A web site. Critiques and NCR's were noted as in the C-A ATS family system. External audit/assessment findings are tracked on the BNL Institutional Tracking System. A review of all tracking systems identified that all findings associated with C-AD have been closed.

OPTIONAL AUDITOR QUESTIONS:

Are roles and responsibility, and authorities defined, documented and communicated?

Has management provided the necessary resources (people, technology, money) to implement this OH&S program?

Has the organization appointed an OH&S management appointee from top management?

Does the R2A2 of the OH&S management appointee document sufficient authority to accomplish a & b above?

How does management demonstrate their commitment for continual improvement of OH&S performance?

| The organization shall have procedures for ensuring that pertinent OH&S information is communicated to and from employees and other interested parties. Employee involvement and consultation arrangements shall be documented and interested parties informed. Employees shall be: □involved in the development and review of policies and procedures to manage risks; □consulted where there are any changes that affect workplace health and safety; □represented on health and safety matters; and □informed as to who is their employee OH&S representative(s) and specified management appointee (see 4.4.1). | | | be documented s and procedures workplace health | | | X | | |
| | | | | | | | | |
| FACILITY IMPLEMENTATION OF STANDARD: Since last year communication and consultation between WOSH committee members, C-AD employees and DOE external communication has elevated. There has been greater employee involvement in the JRA process. WOSH committee consultation concerning 2007 OSH objectives and targets focused on complying with the 10CFR851 requirement for worker participation in establishing health and safety goals that represent meaningful improvement goals. C-AD external communication with DOE concerning Arc Flash corrective and preventive actions taken to prevent injuries in the work place are a few examples of these enhancements. | | | | | | | | |

| H&S Management System Model MANAGEMENT REVIEW | | | | | |
|---|-------------------------|----|---------|-------------------|--|
| ELEMENT: 4.6 TITLE: Management Review | | | | | |
| | | | | | |
| OHSAS 18001 STANDARD: | | NO | PARTIAL | YES | |
| The organization's top management shall, at intervals that it determines, review the OH&S management system, to ensure its continuing suitability, adequacy and effectiveness. The management review process shall ensure that the necessary information is collected to allow management to carry out this evaluation. This review shall be documented. The management review shall address the possible need for changes to policy, objectives and other elements of the OH&S management system, in the light of OH&S management system audit results, changing circumstances and the commitment to continual improvement. | | | | X | |
| FACILITY IMPLEMENTATION OF STANDARD: C-AD/SMD Management Review was performed and documented as required by OPM 1.10.4. Targets and Objectives were identified by Management and documented in OPM 14.30 as required. | | | | | |
| EXISTING PROCEDURES AND DOCUMENTATION (LIST): OPM 1.10.4 and 14.30, C-AD/SMD Management Reviews | | | | | |

OPTIONAL AUDITOR QUESTIONS:

Has top management performed a review of the OH&S management system on a periodic basis? Is it documented? Does the review address the system's:

- continued suitability
- adequacy
- effectiveness

Does the review address possible need to change its policy, objectives and other elements of the OH&S management system? Has this been conducted in light of OH&S management system audit results, continual improvement and changing circumstances?

Does the record of the review include a list of information used for the management evaluation?
